Blue-eyed Ground-Dove rediscovered in Brazil - eBird The rediscovery of such an emblematic and poorly known bird exclusive from Brazil is a remarkable scientific find. This event has been highly celebrated, as most researchers thought the species could already be extinct. Increasing the knowledge on Brazilian biodiversity is the first step to ensure its conservation. Legendary Brazilian Anoles Rediscovered | Anole Annals On late 2014, Dr. Rodrigues and his students (including co-author Mauro Teixeira Jr.) launched an expedition to the mountains of Santa Teresa (state of Espírito Santo, Brazil), the type locality of both *A. nasofrontalis* and *A. pseudotigrinus*. After a few days (and nights) of search, the team spotted the first *A. pseudotigrinus* in decades. The adult female was found sleeping on a narrow branch, (probably) unaware of its significance for South American biogeography (so were we).
